

Boarding INN Windows

Overview **Champion Software Solutions, Inc.** has provided a **New CLASS of Information Management** for the

Boarding / Grooming Kennel managers to thousands of customers worldwide since 1995. **Boarding INN Windows New Release 4i** provides the ultimate functionality with **Powerful Information Centers** that **One Mouse Click access all Check IN / OUT Guests, Owners, Pets, Kennel Availability, Veterinarians, Address Book and Vendors . Powerful Sort Buttons** arrange the Information in the Order that you need. This powerful and comprehensive system has been Designed for Windows XP with full screen view of all Information Centers. Major Functionality Features in the Boarding INN Windows© system is as follows:

Boarding Information: The Boarding information section is encompassed by the complete Boarding database. The unique feature of the kennel system database is "One time Entry". For example, if a new pet comes into the Kennel, the record would be entered and then subsequent visits by the same pet could be retrieved to add current visit information without re-entering a complete new record. Some additional information fields included in the Boarding section that provide greater details include: Vaccinations, Emergency contacts, Veterinarian, Belongings, Special services and Medication scheduling. The Boarding database also enables the user to perform powerful query searches for pet information retrieval.

Reservations

The Reservations portion allows for the entering of regular or new pet boarding based on kennel capacity. This portion enables the user to track all the current activities of the kennel to manage the following: Update reserve capacity, Maintain inventory levels, determines Optional services. The Reservations section provides for great efficiency and use of your Kennel to maximize your profit margin. The Reservations can be set based on an Owner or a Pet. There is also the capability to place one or more pets into a single kennel space while still allowing for separation of fees, retail items and services by pet name on the invoice. Two new Information Centers provide quick access to Owners or Pets. Four Sort Buttons group the information by Owner, Pet, Phone Number or City. This screen also shows any Outstanding Balance for the Owner. If you wish to update the current information such as Vaccinations, just double click on the entry and can edit the Owner / Pet Detail Information.

Availability

The Availability Information Center is located via the FILE, AVAILABILITY menu item. Once you have located the existing customer or added them, the next process is to determine if there is Availability in the Kennel for the date Range. This Information Center provides quick retrieval of the number of runs Occupied and Available for that Category and Date. If you determine to have Availability for that Date, we have enabled a Schedule Button to directly Schedule the Reservation.

Check-In

Every successfully maintained pet kennel stay starts with proper planning and information gathering. The Check-In section is an essential part of kennel management and for that reason the following functionality is provided:

- Enter Kennel assignment
- Enter Optional Services requested
- List belongings
- Note special needs (i.e. medical, vaccinations)
- Print Kennel name tag
- Print Boarding Agreement

Yes; multiple Pet Guests may be Checked In to a single run if you desire.

Check-Out

This section completes the successful stay for a pet and again is designed to cover all the bases. This section's functionality includes:

- Generate invoice based on boarding fee and duration schedule.
- Edit Invoice: **Discounts, Greeting, Retail Items, Special Services,**
- Print Invoice:
- Printing of Release form

- Automatically transfer Invoice income total to Financial section

Grooming

The Grooming section manages the current grooming appointments complete by date range, Groomer, Owner and Pet. Groomers for the kennel can be setup to base the availability for a groomer on a given day by the Groomer's total limit of pets to groom for one day. Also the Groomer's revenue can be based on the total price of the Grooming service or on a percentage. Along with the Grooming appointments there is a separate Grooming Invoice section as well.

Retail

The Retail section manages retail products that are offered for Pet Guests or "Walk In" customers. Boarding INN provides a full Inventory Management System that notifies you when items need to be reordered and Vendors and Alternative Sources for the Products. Markup prices can be maintained on individual items.

System Administration

A sign of a Comprehensive Kennel Management system is the number and level of System Administration features that are available; Boarding INN provides a set of System Administrator tools that aid and assist the Kennel Information Management function. Two levels of Passwords allow for selective security to portions of the system. On Screen Multiple Step Instructions assist in functions such as Scheduling and Invoicing. Detailed progress indicators show you how many runs of each category are defined and how many need to be defined. Special System Administrator features allow for Pets to be marked Inactive and not appear on Owner Lists. Powerful and Safe Selective Data Removal provide for Pet, Owner, No Shows, or Past Reservations be permanently removed from the database when they are no longer required. Past Invoices can be retrieved by date range and edited.

Summary

Boarding INN Windows system is available on Installation CD which includes Documentation subfolder, full Getting Started Manual, Full Sample Database application and Comprehensive On-Line Help.
