
Champions in Windows

Overview **Champion Software Solutions, Inc.** has provided a **New CLASS of Information Management** for the

Dog Owner / Breeders to thousands of customers worldwide since 1995. **Champions in Windows New Release 4i** provides the ultimate functionality with **Powerful Information Centers** that **One Mouse Click** access **all Pets, Shows, Owners, Breeders, Handlers, Judges, Address Book, Vaccinations, and Contracts.** **Powerful Sort Buttons** arrange the Information in the Order that you need. Our System meets all AKC Requirements, and provides unique features such as graphical reporting and imaging. For those who are involved with several different breeds, this system is equipped to manage any number of various breeds within the same system.

This powerful and comprehensive system has been Designed for Windows XP with full screen view of all Information Centers. Major Functionality Features in the Champions in Windows© system is as follows:

Web Enabled Pedigrees: 4 & 5 Generation, Puppy and Working with Image

The Pedigree is very unique in its kind; producing 4 & 5 generations. The Champion dogs can be selected to have their Registered name automatically appear and print in Red and Bold on the 4 or 5 generation pedigree. Furthermore, with our advanced technology, this system incorporates the dog's color photo (in JPG or Bit Map format) with the pedigree, which can be viewed, printed, emailed or displayed on the Internet in HTML or PDF formats. If the user requires detailed information, the pet detail record is available producing a complete history of facts involving a specific dog. The Registered Name, AKC Number and Titles are automatically displayed on the pedigree for each dog. Pedigree Notes can also be entered which consists of 4 lines of text that will appear under the Titles and AKC #. The Pedigree Notes field allows user entered data to appear on the first three generations. Pedigree Notes enables the user to include other important points of information about the dogs.

The Working Pedigree or "What If" Pedigree allows for a pedigree to be viewed and printed for two dogs not yet bred.

The Working Pedigree enables the user to place a Sire and Dam together and then generate the resultant four generation pedigree. The Puppy Pedigree will automatically generate a 4 generation pedigree when offspring are added to a breeding.

Shows/Events Tracking

The Show/Events portion of this system was thoroughly studied and researched to provide the optimum functionality for today's showing needs. There are ten sections available which include:

** Conformation * Obedience * Jr. Showmanship * Other Trials * Herding Trials * Judge's Critique * AKC Entry Forms * Conformation, Junior Showmanship, Obedience and Other Trials Show Histories * * Agility (expanded database for new classes and JWW)*

Each section under Shows contains essential features necessary to maintain proper records in tracking show results including features such as: Cumulative points to date, complete show history details and show expenses management. We have added a Show History Information Center that displays all Shows with Sort Buttons. One Button of interest is Judge that will group a Judge's placements for all dogs in the database. New in the 4i Release is the ability to Copy a Show Detail record for multiple days showing as well as the same show the following year.

Medical Information/History Tracking

A Single Screen Information Center is available to manage all Vaccinations Due / Given. Simply double click on the desired pet to access / add Vaccination data. The Medical portion of this system is designed to track and maintain each dog's medical history and scheduled treatments such as vaccinations, deworming and heartworm prevention. Under the Medical section, all doctors' visits - annual or emergency are included with diagnosis, prescription, and charges which are maintained under each dog. Also under Medical, there is a section whether or not the dog has Dysphasia including a comments area regarding the severity of the disease and treatment. The Vaccinations section has many typical shot types already displayed which allows the user to simply check for shots due and given. On the Vaccinations section the age of

the dog, type of shot and brand of shot can be entered. The Medical History, Vaccinations and Deworming sections all have the ability to print the information displayed.

Champions in Windows

Contracts and Transactions

All Contracts can be viewed, edited and printed from the File Maintenance menu. The Transfer portion of the system provides the ownership status of each dog with available Sales, Lease and Co-

Ownership Contracts. Each transaction is recorded and provides a complete transfer history for each dog. Every contract in the system automatically populates the pertinent information about the dog, owners and buyers. The contracts are flexible to allow the user to store and insert their "own words" into the body of the contract. The system also includes a Stud Contract which is found in the Breeding Information section.

Breeding Records Management

The Breeding portion of the system is designed to track the breeding history of each dog, while maintaining specific breeding details each time the dog is bred. The breeding section incorporates detailed information about the **mating process, birth information and litter evaluation**. Other available features include: **offspring listing, female record management, in-season information, and ovulation testing and pregnancy details report** information. This section also incorporates the following reports: New AKC compliant **Litter Registration Application and Record of Litter Report** for each breeding, A complete **Breeding History Report** for each dog that shows in line breedings and an **Individual Breeding Records** report, **Puppy Pedigree and Puppy Revenue** are also included.

Comprehensive Financial Reporting

The Financial reporting section of this system is provided to maintain and report all incomes and expenses under the specific category the transaction is placed. Many of our customers maintain 100% of the financial records for their business with Champions. All financial information is captured and gathered for reporting purposes. Some pre-defined financial categories are currently provided such as: classes, grooming, handling, boarding, food/supplies, medical, travel, breeding, advertising, show/event and other expenses. The financial report that can be produced in the program include: Individual dog: income, expense, combined income/expense and All dogs: income, expense, combined income/expense. All the previously mentioned reports can be retrieved by a beginning and ending date range as well as a specific financial category, for example Food/Supplies or Medical transactions. Also Income/Expense graph report can be produced with bar charts to reveal a more visual representation of financial transactions.
